Dear Member of Congress,

As a Lutheran and your constituent, I urge you to support funding for the domestic and international environmental programs in the federal budget for fiscal year 2018. I believe that we have a moral obligation to care for God's earth. Domestic programs are in place to protect the air we breathe, the food we eat, the water we drink, and the ecosystems that sustains us. International programs such as the Green Climate Fund help remedy the impacts of our warming planet on the most vulnerable populations among us. We are seeing here in the United States and around the world that environmental degradation results in significant health effects culminating in millions of deaths. The most vulnerable and marginalized are affected the most.

It is time to act on remedying environmental degradation and support funding for the domestic and international programs administered by agencies such as the Environmental Protection Agency and the Department of State. Thank you for taking this bold step to protect our future.

Sincerely,

(Address)
