

CONSTRUCTING AN INUKSUK

JESUS IS THE WAY, THE TRUTH AND
THE LIFE, NO ONE COMES TO THE
FATHER EXCEPT BY HIM." JOHN 14:6

Inuksuk

1. Refer to the illustration as a visual guide for your construction.
2. Find 3-5 flat rocks for the legs and head and 3-5 rocks with a smooth or flatter surface for the body, arms and shoulders. With slight adjustments, inuksuks can also be made with very similar stones.
3. Place the two rocks on a flat stone or plate with 1" -2" of space between them. The top edge of the stones should be about the same height.
4. Balance the largest flat stone flat stone or two on top of the leg stones. You may have to adjust them to get the best fit. Place another flat stone on top, gently shifting until it feels secure. These stones shape the body and shoulders. Secure them in place with glue.
5. Choose two smaller flat stones for arms. Position them to meet in the center and hang over the edge of the "body." Secure them in place with glue.
6. Layer a flat "shoulder" stone next and center a round or chunky stone on top of it for the "head."
7. Let your inuksuk dry before moving it. Depending on its size, you might also place it in a box or bag to transport it.
8. Fold the message card to display in front of the inuksuk.
