Congregations should evaluate their security procedures. Although violent acts cannot always be prevented, appropriate security review should be a part of a congregation's risk management. For more information on risk management issues, see these Church Mutual Insurance Company, S.I. and FBI links:

**More on Violence in Churches:**

Did you know that according to recent research* that there is an uptick in church related shootings - 6 in 2007, 18 in 2008 and 17 for the first half of 2009. Typically, 46% of church violence cases occur during a church event, 53% occur during off hours. 64% occur inside a church building and 36% occur outside on church property.

Here are the reasons why church violence occurs:

- 10% - gang related
- 17% - domestic conflict
- 19% - robbery
- 28% - personal conflict
- 26% - random/other

It is well known from many tragic church related incidents that a determined gunman can cause serious harm. Nevertheless, here are a few things that congregations can do to try to prevent their churches from becoming the sites of crime:

1. **Prevention Steps -- Leadership & Local Authorities**
   - Build a relationship with the local police and ensure that they have current blueprints and photos of the church building, including interiors.
   - In consultation with local police, develop an emergency contact list and distribute it to staff.
   - Arrange to have the police regularly patrol the church property and notify them of upcoming special events.
   - When traveling to other locations, try to do so in pairs and keep cellular phones handy for emergency calls.
• Do call the authorities as soon as possible during or after any incident, don’t wait.

2. Prevention Steps -- **Staff & Volunteers**
   • Develop an emergency plan to address threats of violence, including a building evacuation plan.
   • Communicate plans to key staff and the congregation.
   • Make sure First Aid resources are available and offer First Aid/CPR training.
   • Instruct ushers and greeters to establish eye contact with all who enter the church and report concerns.
   • Watch for strangers and monitor persons exhibiting strange or suspicious behavior, including persons with bulky clothing, trench coats and the like.
   • Make sure all ushers have cell phones and are able to call police/EMS immediately in the event of an emergency or unusual circumstance.
   • Recommend that people arrive and depart the church in pairs or groups, especially after dark.

3. Prevention Steps -- **Building & Grounds**
   • Trim hedges and clear any obstacles to eliminate places a perpetrator could hide.
   • Ensure all outdoor lighting on building and in parking lot is bright and operating properly.
   • Limit number of entryways into the church and have ushers continuously monitor entry activity.
   • Ensure that all exits are clearly marked, unlocked, and well lit.
   • Secure any potential access windows and nonessential doorways.
