

Keeping up with a changing cybersecurity landscape

Nonprofit leaders must deal with the new realities of work. The sudden shift to enable entire workforces to work remotely has raised the stakes. Organizations are looking ahead at how their teams operate and how they protect employees and assets. It's critical, therefore, to stay current on emerging threats and, most importantly, how threat protection is evolving to help keep organizations secure.

In [this e-book](#) you'll learn methods for:

- Identifying emerging threats
- Navigating threats and threat protection
- Embracing Zero Trust

Get started with a free security assessment

Microsoft's Tech for Social Impact team has a goal to meet you where you are on your cloud and security journey, by supporting you in mitigating security risks to your organization's digital environment. The Microsoft Tech for Social Impact team would like to offer you a free security assessment to help you quantify how Azure and Microsoft 365 can help your organization save costs and protect against cyber threats. [Sign up](#) and their nonprofit security concierge will get you set up and walk you through the process.
